Monkey Wrench  
Foo Fighters  
written by Dave Grohl (?)  
from their soon to be released album

OK, so I just heard the new Foo Fighters song on the radio. I really liked. So I decided to figure the main melody out, took me about 15 seconds. But since I only heard it once I can't be too sure about the right key and the chorus. Well here's the big idea ....

He uses an Emaj shape somewhere on his Les Paul , and then does this .....

0	0	0	0
0	0	0	0
2	1	1	1
0	0	4	0
2	2	2	2
0	0	0	0

And I believe he then just drops two half-tones (two frets )(proper English ?) to end it all.  
I think the chorus (Monkey Wrench part ) is another two half-tones lower

Looks a lot like I feel fine from The Beatles, but it sounds cool, now if only someone could mail me the other chords.  
Have fun.
