Chorus Riff: i still can't duplicate the exact sound he makes. i only have a

Zoom505 though and the effects on that are limited.

Bridge: I think there's 2 conflicting phase pedals going on. When i play it i

use pinch harmonics and move my right hand slowley to the extreme left

(near the fretboard) and then back to the right (near the bridge).

It causes the same type of effect if you do it right.
