

## nirvana - Lithium

PROPS GO TO: chris (deadlyespionage[at]aol.com)

Lithium off of Nirvana's last concert in Rome (02-22-94)

I tuned my guitar 2 steps down (full drop d tuning), so instead of it being EADGBE, it's DGCADF. I'm pretty sure that's how Cobain has it tuned. This is the main part of it. The verse is a lil different each time (described in the diagram below). Just get the rhythm of it and start playin it to the rhythm and you should get it sounding right. I typed it up late so it might have some mistakes.

## DIAGRAM:

```
